Wesley Jones

Senior Software Engineer / Technical Architect

Rochester, New York · +1 (585) 831-4961 · waj194@gmail.com · wesjones.net

PROFESSIONAL SUMMARY

Solutions-driven Technical Architect with 15+ years leading architecture and full-stack engineering for major clients. Leverages deep Drupal expertise to design scalable content systems, decoupled apps, and cloud integrations across AWS and JS frameworks. Proven lead for complex transformations on time and budget.

AREAS OF EXPERTISE

AI	Claude AI & Claude Code · Prompt Engineering · RAG (Zilliz Vector DB) · Vertex AI Model APIs
Platforms	Drupal Architecture (7–11) · Magento Platform & Support · Eye Recommend Marketplace · Image Management Systems · Custom Annotation Engines
Cloud & DevOps	S3, Lambda, API Gateway · CloudFront CDN · Serverless Architectures · CircleCI / Travis CI / Docker
Integrations & Code	Salesforce API & Data Sync · Auth0 Enterprise SSO · JavaScript / Node.js / React

EMPLOYMENT HISTORY

Senior Software Engineer · Kanopi Studios — Sept 2022 – Present
Remote

- **AWS Serverless API (twit.tv):** Deployed serverless API architecture using AWS S3, Lambda, API Gateway, and CloudFront, replacing legacy third-party services.
- **Enterprise AI & RAG (UC Berkeley):** Built a decoupled frontend and implemented RAG architecture using Zilliz vector database and Vertex AI model endpoints.
- **E-Commerce Marketplace & Client Solutions:** Architected Eye Recommend's Marketplace platform and provided senior engineering support for SFO Airport and Golden Gate Parks Conservancy.
- **Enterprise API & SSO Integrations:** Implemented bi-directional Salesforce API synchronizations and Auth0 enterprise Single Sign-On across client platforms.
- **Global Infrastructure & AI Workflows:** Maintained China-hosted site for Smalley on Tencent Cloud; established company-wide AI prompt standards using Claude Code.
- **Interactive Educational Platforms (Gilder Lehrman Institute):** Built AP history learning tools (APAAS, Declaration 250) featuring Annotorious text/image annotation, quiz engines, and progress tracking.

Senior Developer · Phase2 Technology — Jul 2022 – Sept 2022
Arlington, VA (Remote)

- **Enterprise Drupal Engineering:** Delivered backend module engineering and technical strategy for large-scale enterprise clients.
- **Design System Integration:** Built component-driven design systems in Drupal using Web Components, Storybook, and React.

Senior Software Engineer & Technical Architect · Third and Grove — Feb 2015 – Feb 2022
Boston, MA (Remote)

- **Technical Leadership & Discovery:** Promoted to Technical Architect; led discovery sessions, architectural design, effort estimations, and sprint planning for enterprise clients.
- **Enterprise Redesign (CooperVision):** Directed technical discovery, architecture, and engineering for the CooperVision redesign, delivering the 18-month project on time and on budget.
- **Custom Features (King Arthur Baking):** Developed a custom interactive Recipe Builder and an automated parsing engine linking recipe instructions to e-commerce products.
- **E-Commerce & Cloud Infrastructure:** Led Magento development and engineered Drupal platforms hosted on AWS, Acquia, and Pantheon using Docker, Travis CI, and GitHub Actions.

Freelance Web Developer · Self-employed — Dec 2011 – Present
Rochester, NY

- **Custom Web Solutions:** Built full-stack web applications for commercial and cultural clients, including Eastman Museum and Boston Museum of Science; Toptal network developer.

EDUCATION

B.S., Mathematics & Computer Information Systems · SUNY Brockport — May 2009

GPA 3.85 · President's List with Honors · Brockport Math and Computer Science Scholar · Student representative on Computer Science Curriculum Committee
